REASONS FOR ALLOWANCE

1. Claims 1-5, 7-10 and 12-15 are allowed in light of the Applicant's arguments and amendment. The following is a statement of the examiner's reasons for allowance. The present application relates to spatial light modulator (SLM) imaging systems that use both an electrically addressable spatial light modulator (EASLM) and an optically addressable spatial light modulator (OASLM) to provide visible images to an observer. Regarding claims 1 and 2, the prior art fails to disclose that the OASLM has at least one electrode that is segmented into a plurality of separately electrically addressable regions, and wherein the controller is adapted to apply write voltages to the electrode so as to address different regions at different times. This selective electrode activation enable the imaging system to simulate an optical shutter system without the need for a shutter system. The claimed invention is therefore considered to be in condition for allowance as being novel and non-obvious over prior art.

2. The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 USC 102 or 103 would be improper. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
